

# TANMAY PANDEY

ASPIRING SOFTWARE DEVELOPER | AI & ML ENTHUSIAST

## PORTFOLIO

+91 9027420929

[tanmaypandey4243@gmail.com](mailto:tanmaypandey4243@gmail.com)

[LINKEDIN](#)

### SKILLS

**Languages:** Python, Java, C, SQL

**Frontend:** HTML5, CSS3, Tailwind CSS, JavaScript

**Backend:** Flask, FastAPI

**Databases:** SQLite3

**AI/ML:** Generative AI, Large Language Models (LLMs), AI Agents

**Tools:** Git, GitHub, Render, VS Code, peripheries, Vercel

### EDUCATION

**Bachelor of Technology in Computer science and engineering**

AMRAPALI UNIVERSITY ,  
LAMACHAUR  
2024-2028 | CGPA : 8.49

#### INTERMEDIATE-PCM

Cynthia Sr. Sec. School  
APR 2023 – MAR 2024

### STRENGTH

- Technical Communication
- Teamwork and Collaboration
- Leadership and Initiative Strategic Planning
- Problem-Solving and Critical Thinking

### SUMMARY

Detailed-oriented Computer Science Engineering (AI & ML) undergraduate at Amrapali University with strong foundations in **Python, Java, and SQL**. Proficient in full-stack application development using **Flask** and optimizing **backend databases**, demonstrated by engineering a **Railway Reservation System** and an **Expense Tracker**. Proven leadership and technical community engagement skills currently serving as a **Google Student Ambassador**. Seeking to leverage technical expertise in a **Software Engineering** or **Developer Internship**.

### EXPERIENCE

- Google Student Ambassador | Google | Haldwani, UK Aug 2025 – Jan 2026**
  - Represent Google technologies on campus, acting as the primary liaison between the student body and Google's product and education teams.
  - Spearheaded adoption of Google Gemini among 500+ students by designing and delivering 5+ workshops on Generative AI and Prompt Engineering techniques.
  - Initiated and executed a GEMINI webinar focused on AI Agent development, resulting in 60 students attended
  - Collected and synthesized monthly user feedback from 300 developers regarding newly released tools, providing actionable insights directly to Google developer relations.
- AI web developer INTERN | InAmigos Foundation | Ongoing**

### PROJECTS

- Railway Reservation System | Lead Developer | Apr 2026 |**
  - Spearheaded backend development of a comprehensive railway reservation platform within an agile 3-member team.
  - Architected core backend logic to manage real-time seat availability, secure user authentication, and seamless booking workflows.
  - Optimized SQL database queries for efficient data retrieval and storage, significantly reducing transaction latency and improving overall system performance.
- Expense Tracker | Backend & Database Lead | Dec 2025 | ([view project](#))**
  - Engineered a full-stack financial web application using Python (Flask) and SQLite3, enabling users to set monthly limits and monitor real-time transaction history.
  - Designed and managed a relational database schema to efficiently process and store categorized user expenses and secure financial data.
  - Collaborated on frontend integration, connecting RESTful APIs to ensure a seamless, responsive user interface across devices.
- Poshan-Pahad AI | AI Developer | Jan 2026 | ([view project](#))**
  - Developed a multimodal ecosystem focused on indigenous foods for a competitive hackathon, leveraging Generative AI and Large Language Models (LLMs).
  - Integrated advanced AI and agentic concepts to deliver a highly customized user experience, providing targeted insights centred around local nutrition and sustainability.
  - This project was developed as a collaborative contribution, where I was responsible for handling the frontend development."
